

# Ideal Lifts selection guide

By going through each step you will be able to select the most appropriate lift

## STEP 1 Capacity

Consider what the lift will be used for:

- Standing only, low capacity?
- Wheelchair?
- Wheelchair plus attendant?
- High capacity, heavy usage?
- How many lifts are needed?

6 person 450kg

8 person 630kg

10 person 800kg

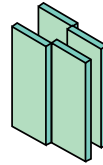

13 person 1000kg

## STEP 2 Door type

This will affect the well size.

Centre opening doors offer a better service, but require a larger well width.

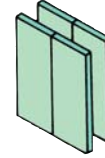

Side opening doors offer a smaller well.

Auto 2 panel side opening on car and landing

Door type: 2S 2S

Suitable for 6,8,13 person capacity lifts.

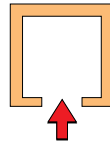

Auto 2 panel centre opening on car and landing

Door type: 2C 2C

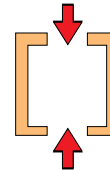

Suitable for 8,10,13 person capacity lifts.

## STEP 3 Entrance positions

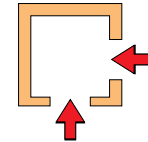

- Front only - smallest well
- Front and rear - increases well size
- Adjacent entrances - available on 8 person lifts as standard, and 10 and 13 person lifts as a special option. This will increase well size.

Front only

Front and rear

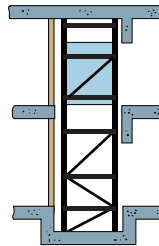

Adjacent entrances

## STEP 4 Mounting

Frame or wall mounted

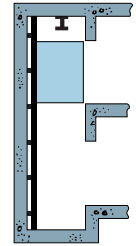

### Frame Mounted

- Option for 6 and 8 person lifts as standard
- Lower building and time cost as the load-bearing walls, lifting beam and scaffolding are not required
- Higher lift cost (approx. 10-20% of cost of lift)
- Slightly larger well size

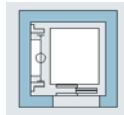

### Wall mounted

- Option for all lifts
- Lower lift cost
- Higher building cost due to construction of load-bearing wall
- Smaller well size
- Needs scaffolding
- Needs lifting beam at top

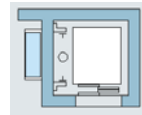

## STEP 5 Motor position

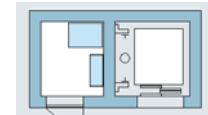

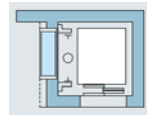

- MRL - completely motor room-less lift
- MRC - motor room cabinet
- LMR - dedicated lift motor room

MRL

MRC  
Surface mounted cabinet    Recess mounted cabinet  
(can be remote to lift well)

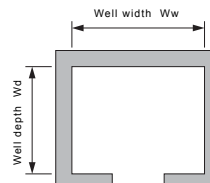

LMR  
(can be remote to lift well)

## STEP 6 Well size

Check against:

- Capacity
- Door type
- Entrance positions
- Mounting
- Motor/pump position
- Then select the finish

## STEP 7 Finishes

A style to suit every budget and separate finishes sheets for the full ranges available

Piccolo
