

Automatic Remote Monitoring (ARM) System

Ideal Lifts are able to:

- Monitor and manage your lift remotely 24/7
- Diagnose and resolve issues without having to visit site
- Improve response time for faults and reduce lift downtimes by knowing which replacement part we may need before we even visit site
- Improve operational efficiency and safety whilst reducing maintenance and callout costs
- Provide peace of mind and be able to respond to faults before you may even be aware of them
